Project Insights & Recommendations

Business Insights

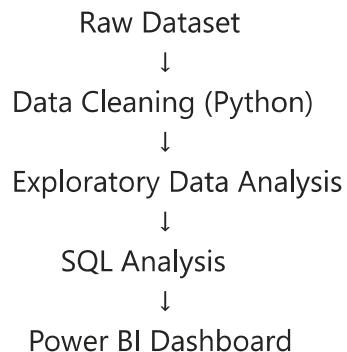

Key Insights

- Movies generate **~68% of total watch time**, indicating higher user preference compared to TV shows.
- **International and Drama genres** dominate streaming engagement across regions.
- **Australia and Canada** show the highest total watch time among users.
- **Mobile and TV devices** contribute significantly to platform consumption.

Business Recommendations

- Invest more in **movie content acquisition**, since movies dominate watch time.
- Promote **top performing genres (International, Drama)** to increase engagement.
- Target marketing campaigns in **high engagement countries** like Australia and Canada.
- Optimize platform experience for **mobile and TV devices** since they drive most watch time.
